

A LAMPRE Interactive Presentation on landslides & triggered landslide events, for students, teachers and the general public. This is one of multiple resources at the **LAMPRE Educational** web site. Interactive presentation designed by F. Taylor (KCL). Credits: Large centre mountain (Prezi, 2014). Other image credits cited in presentation.

## WHAT

LAMPRE Educational (LEdu) is a collection of talks, activities and resources aimed at non-experts to help them better understand the general background, processes, issues and resources available for landslides and triggered landslide events. LEdu is also the potential custom-made educational resources that can be created by LAMPRE, on demand.

## WHERE

The need for education related to landslides and landslide triggered events is everywhere, in all countries. LAMPRE Educational (LEdu) can provide this training, either through existing activities and resources (e.g., via the LAMPRE web page), or through custom made talks, workshops or other material such as learning pamphlets and practicals.

## WHEN

LAMPRE Educational (LEdu) can provide existing resources now, via the LAMPRE web page, or customized educational products and services on landslides, triggered landslide events and other related topics, within weeks to months from the request.

## WHO

LAMPRE Educational (LEdu) is aimed at non-experts interested in learning more about landslides and triggered landslide events, including the general public, students, teachers, and decision makers.

## SPECIFICATIONS

LAMPRE Educational (LEdu) activities and resources include:

- *LAMPRE Landslide talks and workshops* explaining the basics of landslides and triggered landslide events. Webcast versions of these talks are 45 and 3 minutes.
- *A LAMPRE Google Earth Practical* for the identification of landslides (15 pages).
- *A LAMPRE Interactive Presentation* on landslides and triggered landslide events (see top figure, PREZI).
- *A set of 25 LAMPRE Landslide Frequently Asked Questions (FAQs)* with detailed answers.
- *A web site* with all the above activities, plus a set of web links to:
  - General landslide information (8 links)
  - Landslide videos and photos (14 links)
  - Landslide activities and teaching (9 links)

### Example LAMPRE Education Landslide FAQs (available at <http://www.lampre-project.eu>)

"What is a landslide?" ■ "Are snow avalanches landslides?" ■ "What causes landslides?" ■ "What causes landslides in Europe?" ■ "Where do landslides occur?" ■ "What is a triggered landslide event?" ■ "What are the different types of landslides?" ■ "What measures can you take if you live in an area prone to landsliding?" ■ "How would you recognize landslide warning signs?" ■ "What to do during a landslide?" ■ "What to do after a landslide?" ■ "What are the consequences of landslides?" ■ "How soon does the danger of landslides end after the rain stops?" ■ "Is there any way to prevent landslides?" ■ "What is a landslide susceptibility map?" ■ "What is a landslide inventory map?" ■ "What is a landslide risk map?" ■ "What is a landslide hazard map?" ■ "Can landslides trigger a tsunami?"
